I'm passively seeking opportunities to contribute and **learn new technologies** and domains while leveraging my experience as an experienced **React Native developer**.

Experience

REACT NATIVE DEVELOPER Amazecodes Solutions

Bengaluru, Karnataka
Dec 2021 - Present

As a key member of the Software Engineering team at Amazecodes Solutions, I have a crucial role in developing cutting-edge mobile applications with **React Native**. Collaborating closely with various teams, I lead the creation of top-notch software solutions that meet client requirements and exceed expectations.

- Integrated hundreds of **REST APIs** across various projects, simplifying data retrieval and operations.
- **Migrated** React Native projects to the latest versions, enhancing performance and **compatibility**.
- **Revamped** outdated project from scratch using latest frameworks to enhance functionality and ease future maintenance.
- Deployed cutting-edge **anti-face spoofing** and **facial detection** modules across multiple projects, enhancing security and user engagement.
- Leveraged **Google Maps** and its APIs to seamlessly incorporate **offline navigation** and location-based features.
- Managed **internal server transitions** across environments, ensuring uninterrupted operations for users as well as development teams.
- Assisted with setup configurations for **IoT** devices using **MQTT** connections, optimizing device functionality and connectivity.

Skills & Expertise

Relevant Coursework:

- React Native
- Django (Python)

Programming Skills

- JavaScript
- Python

Education

BTech Computer Science & Engineering

2017 - 2021

APJ Abdul Kalam Technological University
Vidya Academy of Science and Technology
CGPA : 6.9 Thrissur, Kerala

Higher Secondary

2015-2017

Poilkav HSS - Computer Science

Percentage : 66% Quilandy, Kozhikode

High School

2012-2015

Amrita Vidyalayam

Percentage : 78% Quilandy, Kozhikode

Relevant Projects

[View Portfolio](#)

Human Resource Management App

UAE
2022- Present

Implemented features encompassing face scanning and validations, employee leave applications and reviews, reimbursement and salary payslip processing, featured news feeds, clock-in/out functionalities for working days, overtime tracking, attendance logs, and management of employee shifts and schedules and more.

Off-road Route Tracker

Nagland, India
2022- -2023

Engineered a location-based app facilitating the storage and tracking of off-road routes in remote areas. Implemented offline functionality using Google Maps APIs and offline local database storage, allowing users to locate and track routes without internet connectivity.

Smart Home Automation

Bengaluru, karnataka
2022- Present

Contributed to the development of a Smart Home Automation App, specifically focusing on integrating smart switches for electrical and electronic appliances. Supported the implementation of IoT device automation through MQTT connection, enhancing overall functionality and user experience.

Smart Kiosk App for Offices

UAE
2022- Present

Designed and implemented a Smart Kiosk App for seamless office attendance logging. Positioned at the office entrance, the app allows employees to use Bio-metric face scanning for attendance marking upon entry, during breaks, and when exiting the office, providing a convenient and efficient attendance management solution.

Warehouse Management Application

Qatar
2023- Present

Developed a warehouse management app streamlining the handling of inbound and outbound goods. Empowered warehouses to efficiently manage customer releases, handle inbound shipments, and maintain comprehensive documentation for all transactions.

Educational Content Management App

Bengaluru, karnataka
2022

Designed and implemented an app enabling teachers and instructors to create and share study materials, including videos and documents. Students can seamlessly access these resources through the app, submit assignments, and engage with educational content for an enhanced learning experience.
